

# UFED Cloud Analyzer

Version 6.2 | October 2017

## Highlights

Cloud data today plays as much of an important role in investigations as the data from digital devices. With mountains of data being backed up, posted on social media channels, or simply uploaded and stored on the cloud for file sharing, investigators understand the benefit of investigating this arena - approximately 81 percent of law enforcement employees report they actively use social media as an investigation tool<sup>1</sup>.

UFED Cloud Analyzer 6.2, expands your cloud evidence reach with new access to popular cloud storage applications and social media platforms, in accordance with the laws of local jurisdictions.

### UFED Cloud Analyzer 6.2 enables you to:

- Gain access to evidence in the iCloud backup from mobile devices running iOS 11 or higher.
- Access Google's Takeout, and extract personal information on a subject from many Google supported applications.
- Expand your case's social media evidence with user account info from LinkedIn.
- Extract and preserve critical case information from the popular cloud storage provider, Box.

## Gain access to evidence in the iCloud backup from mobile devices running iOS 11 or higher

Today, many agencies struggle to get into iPhones and other Apple devices. The majority simply do not have the tools or funds, which can delay investigations and result in a cold case.

But with UFED Cloud Analyzer 6.2, users can access information that was previously backed up to the iCloud using the subject's user name and password or iCloud backup token extracted from the subject's PC via the UFED Cloud Analyzer PC extraction tool.

Access to a locked phone's iCloud backup can provide valuable case information. Obtain data from: Attachments, Calendar, Call history, Camera roll, Contacts, Device info, Notes, Messages, Social communication and more.

## Access Google's Takeout Service and extract personal information on a subject from many Google supported applications in a single extraction

One of Google's many diverse range of services is Google Takeout – a service that enables users to download everything in a zip file from personal Google accounts, including documents and pictures, to 'Takeout' which can then be backed up to a computer.

UFED Cloud Analyzer 6.2 provides access to newly supported data sources as well as the data held in the Google applications and backed up into the Google Takeout.

**Newly supported data sources include:** YouTube, Keep, Fit, Google+ Circles, Hangouts and Profile data.

**Supported Google Takeout applications include:** Calendar, Chrome, Contacts, Drive, Gmail, Google Photos, Location History and Tasks.

## Industry exclusive: Expand your case's social media evidence with a subject's user account info from LinkedIn

With 467 million members<sup>2</sup>, and more than 30,000 long form posts published every week<sup>3</sup>, LinkedIn is one of the leading social platforms in the world. UFED Cloud Analyzer 6.2 is the only solution in the market to date that can provide access to a user's account; allowing investigators to gain critical insights from conversations, reported work experience from the suspect's bio/CV, and other information that may be critical to a case.

**Extracted information includes:** Contacts, chat messages and any attachments from within the chat, comments by the user and the post they were on including attachments, posts by the user including any attachments, profile details, and details of 'who viewed your profile'.

## Don't just think outside the Box, get critical data from inside

Today, Cellebrite is supporting some of the leading cloud storage providers, including Dropbox, Google Drive, OneDrive, iCloud Drive and now Box – a very popular cloud storage service, Box has more than 41 million users, and 74,000 businesses use Box to manage content in the cloud.

UFED Cloud Analyzer 6.2 aids authorized persons to access a suspect's files, with or without a password, and extract photos that were taken on his device and automatically synced to the cloud, including personal documents and more.
