Decoding of MTK Android Backup

When physical extraction is not available, you can now generate a backup of an MTK Android mobile device, even if it is locked, and decode it using UFED Physical Analyzer.

For further guidance on how to initiate this backup option from the MTK device recovery partition, please refer to our whitepaper <https://cf-media.cellebrite.com/wp-content/uploads/2018/04/decoding-mtk-android-backup.pdf>

Cryptographic hash values information

You can validate the integrity of Cellebrite's UFED software files by verifying their cryptographic hash values. This can help you identify whether a file has been changed from its original state.
