RELEASE NOTES

UFED, Cellebrite UFED Cloud, Cellebrite Physical Analyzer, Cellebrite Logical Analyzer and Cellebrite Reader v7.34

June 2020

Now supporting: 31,113 device profiles

App versions: 10,831

Forensic methods	v. 7.34	Total
Logical extraction	20	12,040
Physical extraction*	20	7,722
File system extraction	19	7,721
Extract/disable user lock	1	3,650
Total	60	31,113
*Including GPS devices		

The number of unique mobile devices with passcode capabilities is 5,545.

App support

- Instagram app for Android Now supporting the decoding of social media activities.
- Wickr app multi-account for Android Now supporting multiple app/accounts of the Wickr app installed on same device and the indication of events with relation to the account.
- WeChat Control WeChat iOS extra data The Decoding of fts_messages.db brings another source of data for WeChat app. This will give the potential to recover deleted/missing WeChat records, and on other hand, can surface duplications. You can control the number of duplicates by turning off the "Parse FTS content from WeChat" setting in the global settings window.
- WeChat decryption with IMEI number In newer versions, WeChat decryption is based on the IMEI number. In this version, if the IMEI number is not found on the device, users will have the option to enter the IMEI number manually, to enable full decryption and decoding.
- 108 updated applications Support for 108 new app versions for iOS and Android devices.

Cellebrite Physical Analyzer 7.34

First Time Access to Private and Public Cloud Capabilities

For a seamless and simplified review process, Cellebrite Physical Analyzer users can review device and cloud data through a single tool and with a unified experience. By adding the Cellebrite UFED Cloud license to Cellebrite Physical Analyzer, and enabling open connectivity to the internet, users have multiple options to access cloud data;

- User credentials provided under consent by a victim / witness / suspect
- Device tokens extracted using UFED
- PC Browser cookies

In celebration of this achievement we are extending a special discount for a limited time. Contact sales to learn about the **special discount that may apply.**

Customers interested in evaluating Cellebrite UFED Cloud solution, can now do this by upgrading to version 7.34, and using the FREE trial that is available until July 31st.

To help you get started, we have put together this simple to follow **Getting Started Video**.

UI Enhancements

To address feedback provided by users following the launch of version 7.33, we have made the following enhancements:

- Time bar An option to zoom in and out is now available using the (+) and (–) buttons (in addition to the scroll bar). In addition, the graphical time bar is always presented.
- Data files section is now separated in the analyzed data.
- Themes settings There are 2 color themes available: dark and white. You can change it in the settings.
- Select/Unselect items for the report is now available in the global kebab menu. You can also Select/Unselect items in the timeline view.
- The screen capture icon has moved to the top menu bar, to enable smoother scrolling.

Cellebrite UFED Cloud 7.34

Major UI Overhaul

The <u>video</u> shows long overdue changes to Cellebrite UFED Cloud. The substantial changes come as a result of the direct feedback we received from you, our customers, as we constantly evolve our digital intelligence solutions to better support you in undertaking your investigations successfully.

Built on the field proven foundations of Cellebrite Physical Analyzer, Cellebrite UFED Cloud not only brings a modernized user interface, but incorporates several of the existing and new capabilities of Cellebrite Physical Analyzer including watchlists, graphical timeline, text translations, data enrichment, and more.

To help you get started, we have put together this simple to follow **Getting Started Video**.

Cellebrite UFED Cloud Known limitations/Product Gaps

- The Web Capture capability is not supported.
- Direct Public extraction capabilities are not supported.

UFED 7.34

Qualcomm Live

We are excited to announce first-time support for a generic full file system or physical extraction for unlocked Android devices equipped with a Qualcomm chipset. The new Qualcomm Live capability extends access to latest devices from major Chinese vendors such as Xiaomi, OPPO, OnePlus, VIVO, as well as devices from Nokia, LG Motorola and others, running OS versions 7 up to 10.

This generic method, like most of the generic methods in UFED, has been developed with the aim of supporting devices from multiple vendors and chipsets using a single generic profile. The generic method addresses an immediate customer need to access devices with Android 8.1 or above. Users do not require any special cables or techniques to perform the extraction.

Note: Support for Samsung and Huawei is coming soon.

Supporting MTK-Based VIVO Devices

As VIVO extends its market share in several areas of the world, we have expanded our first-to-market MTK Live capability to encompass support for MTK-based VIVO devices.

A comprehensive list of the newly supported devices is available in the Phone List section.

Supporting New Devices with Samsung Decrypting Exynos

This version introduces support for Samsung devices with full-disk encryption such as the Samsung Galaxy S9 and the Samsung Galaxy Note 9 running Android 10.

Insights from Installed Applications

This version of UFED also provides users with a bird's eye view to device data with the new Insights from Installed Apps. The installed application data will be presented prior to performing an Android device extraction. You can locate the information in the Device Info page, where the Device Properties are displayed. The capability is designed to help examiners make insightful decisions around where to focus their extraction efforts upfront, to optimize their examination process downstream. It is also an effective way to detect suspicious activity and enhance your phone triage process.

Cellebriter Physical Analyzer: Solved Issues

- Decoding failure of the Signal app for iOS full file system extraction.
- Decoding of call logs from the Nokia RM-1172 device.
- Crash while decoding KeepSafe app.
- Decoding failure of Chrome apps version 62.0.3202.84.
- Error while saving a UFDX file for more than 2 merged warrant return sources.
- Error while saving a dump for images.
- Errors while running the locations carver.
- Address book parsing failure for iOS 3.0 devices.

Cellebriter Physical Analyzer and Cellebrite UFED Cloud: Known Issues

- Public data enrichment is currently not working. We are working to fix it in the coming releases.
- Cancelling the cloud data extraction during the extraction process is only applicable from the Notifications Center.
