

# Cellebrite Physical Analyzer, Cellebrite Logical Analyzer, UFED Cloud and Cellebrite Reader v7.35

June 2020

App versions: 10,933

App support

- **102 updated applications** - Support for 102 new app versions for iOS and Android devices.

## ➔ Major performance boost

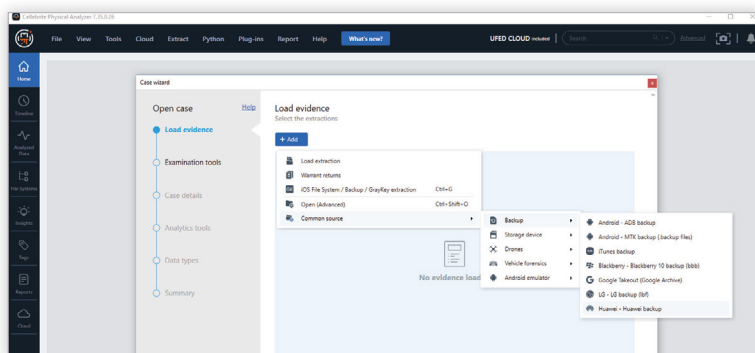

We are happy to announce that this release, version 7.35, is our most efficient version yet, with a set of new enhancements to greatly improve the product's performance.

- Up to 20% memory reduction, enabling opening and processing of larger dumps.
- Up to 20% reduction in open time for single large file (Embedded files) and general improvement in dump open time in last stage.
- Highlights database size reduction, mainly for dumps with a large number of chats.

## ➔ Decoding of Huawei backup and Huawei HiSuite backup

You can now import and decode Huawei backup data in Cellebrite Physical Analyzer. This backup option is available in almost all Huawei devices (device needs to be unlocked). The backup data may include important data and a good solution when data extraction is not applicable or lost. A Huawei backup can be created in Huawei's HiSuite software on a computer or on the device itself/SD card. Both backup formats are supported by Cellebrite Physical Analyzer.

To import a backup file go to Open case > Common sources > Backup > Huawei – Huawei backup.

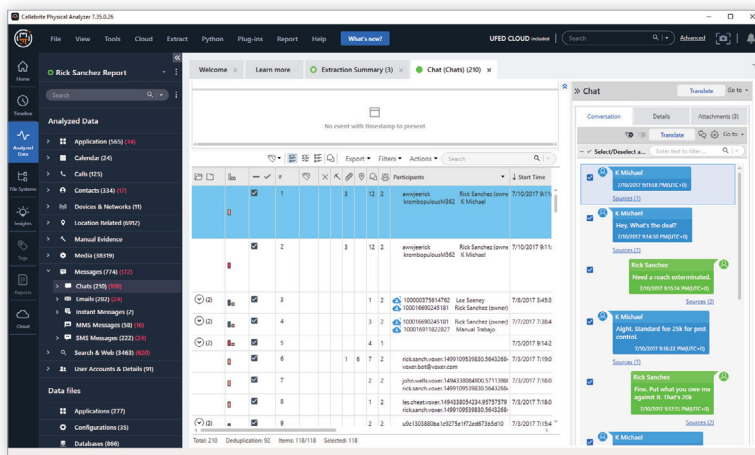

## → Advertising ID for Android logical extractions

Following the enhancement in version 7.32, we have added support to enable the decoding of the Advertising ID when performing advanced logical extractions of Android devices.

## → New conversation view tab for chats

When selecting a chat item, a bigger view of the chats bubbles will appear in the right pane, enabling more visible chat conversation for easier review.

*Note: This is the default tab, in addition to the details tab.*

## → 2-Factor authentication on Twitter

UFED Cloud now supports 2-Factor authentication on Twitter data source.

## → UFED Cloud trial period

This is a reminder to all users that you have the possibility to extract and review cloud-based content from more than 50 data sources, inside Cellebrite Physical Analyzer.

The trial software is available for your use until July 31st. We have a special promotion running until end of July for those interested in purchasing UFED Cloud.

Contact sales or complete the [Sales Inquiry](#) form.

## Solved Issues

- Missing device info when merging several extractions.
- Empty system messages in WhatsApp for iOS (You're now an admin).
- Missing owner picture in WhatsApp chats for Android.
- Save session not applicable in selected Greykey extractions.
- A crash in timeline on scrolling.

- Facebook lite messenger version 43.0.0.17.184 parsing error.
- Decoding failure of Wickr version 5.47.6 even when the correct password is provided.
- Screen capture and video recordings file under Additional files are not applicable.
- Unknown Media Type parsing failure for Telegram app version 5.15 for Android.
- Missing device owner from participants list in WeChat app for iOS.
- Decoding failure of Line app for iOS.

## iOS: New and updated apps
