

# SHINE A SPOTLIGHT ON CRITICAL DATA.

Analyzing digital evidence is harder than ever due to an overwhelming volume of digital data, and lengthy, complex review processes. A recent survey of agencies, examiners, and investigators revealed a need for improving data analysis, organization, and collaboration methods.

**96%** agreed that investigations could benefit from more effective tools to accelerate time to evidence.\*

**Examiners face challenges when reviewing digital evidence.**

believe data review takes too long.

believe data review is too complex.

feel they miss key evidence.

**Prolonged digital data review can slow investigative workflows.**

**Average Device Contains**

**50K+**  
images

**3+**  
hours of video

**500K**  
messages

**37%**

prioritize examining time-sensitive data or devices from certain cases.

**90%**

of cases involve smartphones as the main source of evidence.

**33%**

are dissatisfied with sharing and collaboration procedures.

**Investigators should focus on fighting crime, not time.**

**Cellebrite Pathfinder easily integrates with your agency, expediting investigation processes and increasing case-close rates:**

- **Using AI** to filter and analyze enormous volumes of data, find connections, identify patterns, uncover leads, and enhance investigative efficiency and productivity.
- **Organizing complex data** in an intuitive format across texts, emails, videos, documents, and applications to pinpoint key evidence.
- **Enabling collaboration** among internal and external stakeholders to improve workflows with easy sharing tools.
