

## Unprecedented Lawful Access to iOS and High-End Android Devices

Locked devices and encryption barriers can result in extended investigation times, leading to additional costs and lower clearance rates. As smartphones continually have smarter and more protective features, including implementation of complex locks and built-in encryption mechanisms, unlocking and extracting data from market-leading iOS and Android devices has become a constant challenge.

Cellebrite Premium is an on-site solution that enables you to recover the passcode, unlock and perform a full file-system extraction on Apple devices running the latest iOS versions. But it doesn't stop there. With Cellebrite Premium you can bypass locks and perform a physical extraction on many high-running Android devices. By performing full-file system and physical extractions, you can get much more data than what is possible through a logical extraction, and access highly protected areas such as the iOS Keychain or the Secure Folder.

Accessing 3rd party application data, stored passwords and tokens, chat conversations, location data, email attachments, system logs, as well as deleted content, increases your chances of finding the incriminating evidence.

Cellebrite has a proven and unmatched track record of delivering innovative digital forensic solutions, that help law enforcement globally to access data from hundreds of devices. Recover and examine evidence that you can stand behind in court, from the convenience of your forensics lab, and rest assured the chain of custody is maintained.

## Key Benefits for iOS Data Extraction

### Unlock Apple devices

Determine passcodes and perform unlocks for Apple devices running various iOS versions.

### Sophisticated algorithms to minimise unlock attempts

When brute-force attempts are required to reveal the device passcode, you can shorten unlock times by creating case-specific custom dictionaries optimized for the exhibit.

### Perform a forensically sound full file-system extraction

- Bypass iTunes backup encryption to extract all data possible.
- Gain access to stored passwords and tokens from the Keychain.
- Recover data from 3rd party applications including WhatsApp, Facebook, Telegram and many others.
- Get emails and attachments.
- Get location information from multiple streams of data (WIFI and Cell towers).
- Reveal system logs and application log data.

## Key Benefits for Android Data Extraction

### Unlock Android devices

Bypass, brute-force or gain AFU on a wide range of Android devices including Samsung, Huawei, LG, Motorola and others.

### Perform a forensically sound full file-system or physical extraction

- Gain access to app data protected with additional passcodes via KNOX Secure Folder.
- Extract unallocated data to maximize recovery of deleted items.
- Recover data from 3rd party applications including WhatsApp, Facebook, Telegram and many others.
- Get emails and attachments.
- Get location information from multiple streams of data (WIFI and Cell towers).
- Reveal system logs and application log data.

# Support for the Widest Range of Devices

## iOS Devices

- Apple iPhone 4S - iPhone 12
- Apple iPad 2, 3rd/4th Gen, iPad 5/6th Gen, iPad mini 1st Gen, 2, 3, 4, iPad Air, Air 2, iPad Pro
- Apple iPod touch 5th/6th Gen
- iOS 7 to iOS 14.8

## Android Devices

- Support the widest range of Android devices from leading vendors including Samsung, Huawei, LG, Motorola, Nokia, OPPO, Xiaomi and others\*.
- Brute-force a wide range of Android devices equipped with different chipsets such as Qualcomm, MediaTek, HiSilicon Kirin and MTK for both file based and full disk encryption.
- Gain After First Unlock (AFU) access to locked Android devices protected with the latest encryption and software updates.
- Unlock secure startup Androids.
- Access data stored in secured containers like Samsung Secure Folder, Huawei Private Space, and Xiaomi Second Space.

\*This list is continuously updated so you should contact Cellebrite for the latest information.

## About Cellebrite

Cellebrite is the global leader in partnering with public and private organizations to transform how they manage Digital Intelligence in investigations to accelerate justice and ensure data privacy. We aid organizations in mastering the complexities of legally sanctioned digital investigations with an award-winning software suite and services to unify investigative workflows and manage Digital Intelligence. Cellebrite works with industry leaders to help them protect the public and safeguard assets with efficiency and transparency. Trusted by thousands of leading agencies and companies in more than 150 countries, Cellebrite is helping customers fulfill the joint mission of protecting and saving lives.
