

Protect the Warfighter and Help Ensure Our Nation's Security

Exploit, Analyze and Manage Digital Data Sources with Cellebrite's Industry-Leading Digital Intelligence Platform

The U.S. Department of Defense (DoD), Intelligence Community (IC), and supporting agencies, are under intense pressure to comply with federal mandates to modernize their technological infrastructure and pursue digital transformation. As these entities work to ensure they can meet their critical missions in an increasingly digital world, their leaders are seeking the most effective ways to:

- Equip personnel operating in the field with leading-edge tools and capabilities for collecting and analyzing digital data, on objective
- Establish a Digital Intelligence pipeline that automatically normalizes and unifies data by leveraging advanced parsing and AI/ML engines
- Accelerate the exploitation of data to inform decision-making while ensuring data provenance
- Visualize data and share intelligence in standardized formats with key partners and allies

Cellebrite provides advanced Digital Intelligence (DI) solutions that equip warfighters to accomplish all of the above and more — both today and into the future.

We also offer DI training, taught by industry-leading experts, that offers a clear and easy path for DoD and other personnel to learn advanced forensics skills and knowledge in just a few weeks.

Additionally, Cellebrite's advanced digital forensic lab facilities and expertise are at the ready to help federal entities overcome their toughest digital forensics challenges.

Why Partner With Cellebrite?

Cellebrite supports the DoD and other federal government entities in their shared mission to help protect the national security of the United States. We provide industry-leading DI solutions, training and services that help their teams to:

- Acquire, analyze, and manage digital evidence more effectively
- Apply advanced media exploitation capabilities to access and acquire data from CELLEX/MEDEX devices
- Target very discrete data sets for exploitation
- Validate data confidently and protect its provenance
- Create visualizations of data that are easy to interpret and share
- Provide actionable intelligence to accelerate critical decision-making

ABOUT CELLEBRITE

Cellebrite is the global leader in partnering with public and private organizations to transform how they manage Digital Intelligence in investigations to protect and save lives, accelerate justice, and ensure data privacy.
