

Conduct More Efficient Investigations of Federal Agency Programs & Operations

Collect and analyze digital evidence faster to reduce backlogs and close more cases with Cellebrite's industry-leading Digital Intelligence Platform.

The Offices of Inspectors General (OIGs) in the federal government conduct audits and investigations that promote the economy, efficiency, and effectiveness of their agency's programs and operations to help prevent and detect fraud and abuse. However, their own teams, which often include criminal investigators, are often challenged in conducting efficient investigations that require the collection and analysis of high volumes of data in different formats from various digital devices.

Lack of resources and the use of outdated equipment often contribute to investigative efficiency for OIGs. In a recent study, 96% of law enforcement investigators said their investigations could benefit from more effective tools to accelerate time-to-evidence. By bringing Cellebrite Digital Intelligence (DI) solutions into their investigative workflow, OIGs can also force-multiply the capabilities of their teams to overcome resource gaps, speed investigations, and reduce case backlogs.

Cellebrite supports OIGs in their agency-specific missions by:

- Making it easier for investigators to collect and review digital evidence, regardless of its source or format
- Providing secure data storage, integration, and management while enhancing data-sharing and reducing chain-of-custody risks
- Training OIG staff on how to collect and handle digital evidence appropriately to gain actionable intelligence quickly

Why Partner With Cellebrite?

Cellebrite helps OIGs achieve their core mission to detect and deter fraud, waste, and abuse in the federal agencies and entities for which they provide independent, objective oversight. We provide industry-leading DI solutions, training, and services that can help OIGs and their teams to:

- Acquire, analyze, and manage digital evidence for agency investigations more efficiently
- Defeat encryption on digital devices quickly while ensuring vital data isn't lost
- Target very discrete data sets for exploitation
- Validate data confidently and protect its provenance
- Create visualizations of data that are easy to interpret and share
- Provide actionable information for critical decision-making faster

ABOUT CELLEBRITE

Cellebrite is the global leader in partnering with public and private organizations to transform how they manage Digital Intelligence in investigations to protect and save lives, accelerate justice, and ensure data privacy.
