## Experience Cellebrite Inseyets.PA

Start tapping into richer data with Cellebrite Inseyets.PA, the industry leader in digital data examinations. Decode more data, reveal deeper insights and reach case resolutions faster than ever before.

## Cellebrite Inseyets.PA Capabilities

### Widest & Deepest Application Coverage

Support for more than 370 apps, over 10,000 versions with frequent updates.

### Immediate Insights

See key information at a glance courtesy of the Insights Tab and an intuitive dashboard.

### Export, Import and Reopen Cases

Process evidence only once and reopen cases in seconds. Save space by exporting files with the ability to import files and continue where you last stopped.

### Media Origin

Holistic and defensible methodology based on rigorous research. Quickly identify important media or exclude irrelevant media.

### Powerful Deep Dive & Validation Tools

Dive into Hex View and Data Interpreter. Leverage Database Viewer/Carver, File Format Viewer, App Genie, SQL Wizard and Directory Browser.

### AI Media Classification

Let AI scan through the media and look for the evidence you need. Zoom in quickly on the most crucial ones.

### Intelligent Deduplication – Garbage Filter

Stop working on data multiple times. Analyze once and make it count.

### Description Location Labels

Quickly identify Visited Locations, Searched Locations, Media Locations and gain even more data with Locations Carver.

### Intelligent Model Design

Smaller number of well-defined models, consistent labeling, better timelines, easier searching and filtering, and clearer relationships.

### UFDR/Reader Reports

A new reader with the same simple interface but with an overhauled backend for faster performance.

### Advanced Search

Leverage enhanced search options like 'And/Or' filters, data type targeting, time filters & document content search to pinpoint critical information.

## Cellebrite Inseyets.PA Outcomes

Faster surfacing of key evidence, leading to quicker case resolution

Ensure a high level of data credibility and validation

Significantly reduce backlogs to efficiently drive cases forward
