

Spring 2025 Release Fact Sheet

May 2025

The Cellebrite Spring 2025 Release marks a major leap forward with the next-generation Cellebrite Digital Investigative Platform. Introducing a powerful new Cellebrite Cloud foundation and enhancements across our portfolio, the Spring 2025 Release accelerates case resolution through AI-driven productivity, intuitive workflows, and enterprise-grade security. It supports cloud, on-premises, and hybrid deployments, and is backed by Cellebrite's expert services—helping organizations transform digital evidence into actionable intelligence.

The Platform for Digital Investigations:

Product and Services

Guardian

Cellebrite Guardian is a cloud-based solution that brings together centralized digital evidence management with shared review capabilities, allowing an entire case team to access what they need from anywhere while maintaining a clean, unbreakable chain of custody.

- **Timeline View:** Chronologically displays key case moments from multiple evidence sources to improve investigative context.
Available now
- **Semantic Search:** AI-powered language models help uncover hidden connections and related content across datasets.
Available: June 2025
- **Browser-Based UFDR Review:** Securely review UFDR data directly in the browser without the need for file transfers.
Available now
- **Real-Time Sharing:** Enables quick collaboration between internal teams and external partners with role-based access.
Available now
- **Unlimited Access:** Share with as many stakeholders as needed without technical constraints.
Available now

Pathfinder

Cellebrite Pathfinder accelerates investigations by using AI to quickly find evidence, uncover leads and connect people to digital data. It normalizes digital evidence from multiple sources and uses machine learning to spot patterns and reveal insights from mobile, cloud, computer, CDRs and video data..

- **New in Pathfinder:** Decode UFDs 4X faster—investigators and analysts can now decode UFD files directly in Pathfinder, eliminating the wait for lab exports. Built-in decoding to 50+ event types including newly added —Activity Sensor, Financial Account and Transfer of Funds—delivering faster insights and accelerating case closure.

Available: May 2025

- **Automatic Speech-to-Text (STT) and Translations:** Automatically transcribe audio and video files to speed up evidence review and reduce manual effort.

Available: July 2025

Smart Search.

Uncover critical leads faster with Cellebrite Smart Search—a powerful tool to run publicly available information searches to help you identify key individuals and connections in minutes, not hours. Get a clear view of a person’s digital footprint using publicly available data to strengthen search warrants and move investigations forward with confidence. With just a few clicks, you can cut through the noise to find what matters.

- **Summary Dashboard:** Consolidate digital profile details into an intuitive, user-friendly view.
- **Expanded Data Filters:** Quickly build a list of potential threats by seeing a suspect’s top connections and frequent faces on social channels.

Insights

Cellebrite Inseyets is a purpose-built, all-inclusive digital forensics suite powered by the advanced extraction of Premium combined with the next-generation of UFED. The capabilities of PA (including Reader), Cloud and Commander are also included as well as our new lab automation application, Cellebrite Autonomy.

- **Modern UI + Faster Decoding:** Enhance performance with a redesigned interface and accelerated case processing. Uncover critical details faster with a centralized view of enriched data and new insights about media files.

Available: June 2025

- **Media Intelligence:** Surface deeper insights and patterns from media files, improving review speed and internal investigations.

Available: June 2025

- **Strengthened Partnership with NCMEC Technology Integration:** Coming soon, speed up online child exploitation investigations with an integration to the National Center for Missing & Exploited Children (NCMEC) hash set.
Available: June 2025
- **Streamline Enhancements:** A full set of Inseyets.PA examination tools can now be pre-configured in Streamline as well as a new report configuration, enabling filtering of the Examination report content by “File Types” and “Data types”.
Available: June 2025
- **More Data in the Quick View Feature for iOS Devices:** New list of Data fields are now available in Quick View: apple id email, Last reboot & Factory reset times, Wifi Geolocations and Passwords from the Keychain and improved Time zone indication.
Available: June 2025
- **Speech-to-Text (STT):** Automatically transcribe audio and video files to accelerate evidence review and reduce manual effort.
Available: June 2025

Endpoint Inspector.

Cellebrite’s Endpoint Inspector is an efficient, consent-based solution for remote collection, analysis and review, providing defensible data at your fingertips. Collect from various modern data sources, including mobile, computer and cloud without special cables or shipping and travel inconveniences.

- **Direct Decoding to UFDR:** Skip extra processing tools and utilize mobile decoding as a service. Now you can send mobile data straight to review platforms like RelativityOne—faster, simpler and more flexible.
Available now
- **Precision Date Filtering:** Avoid over-collection with targeted timeframes, so you spend less time sifting through unnecessary data.
Available now
- **Mobile Device Test Collections:** Examiners can identify up to two mobile devices that can be used as test or validation devices to ensure end-to-end collections are working properly or for compliance and regulatory audits.

Training & Services

Cellebrite offers flexible onboarding and training services tailored to each organization’s journey. From initial implementation, through user onboarding to certified Training, these services help teams seamlessly adopt new workflows and maximize platform value—whether deployed on-premises or in the cloud. Our comprehensive training courses empower you to accelerate your examination workflow, strengthen investigations and close cases faster. Our Learning Hubs extend this flexibility even further—offering on-demand, product-specific micro-training embedded in tools like Inseyets and Reader to support continuous learning at every step.
