

Stronger Cases.
Unified Evidence.

Safer
Communities.

In today's data-driven world, agencies must be able to rapidly access, analyze and share digital evidence to keep communities safe, disrupt organized crime and bring justice to victims.

Our Industry Trends survey reports **98% of prosecutors say digital evidence from mobile devices is critical for convictions**. Cellebrite is the leading AI-powered Digital Investigation Platform purpose-built to **accelerate investigations by 10X**, strengthen prosecutions, and maximize the impact of public safety resources.

Trusted by agencies worldwide and proven in the field, Cellebrite partners with law enforcement, prosecutors and multi-agency task forces to deliver actionable intelligence, reduce backlogs and ensure an unbroken chain of custody.

Cellebrite helps agencies foster public trust and build safer communities to protect citizens today and help prevent tomorrow's threats.

Cellebrite helps create safer communities through accelerated case resolution and stronger prosecutions across a variety of crimes. Customers leverage Cellebrite to reduce evidence review from **six weeks to four days**.

- **Secure the border and disrupt organized crime** via rapid, lawful digital evidence collection and cross-agency sharing.
- **Keep schools and families safe** by enabling proactive threat detection and coordinated response.
- **Disrupt narcotics networks** with rapid access to the most relevant information while identifying connections across patterned activity for stronger cases.
- **Fight human trafficking** with faster data navigation, uncover crucial evidence and accelerate justice for victims of human trafficking.
- **Support victims** with defensible processes and ironclad digital evidence that minimizes re-traumatization and speeds up cases.

Challenges managing and sharing evidence:

 Manually driving or shipping evidence risks data integrity, chain of custody issues and delays due to compromised evidence.

 Departmental or agency silos with lack of visibility into intelligence from other teams.

 Risk of delayed justice, lost credibility and eroded public trust if evidence is lost, mishandled or damaged.

 Limited interagency communication leads to missing bad actors and critical case information.

Seamlessly share and analyze the data that matters most, strengthening interagency collaboration, public safety & public trust.

Create the Ultimate Intelligence Center

Easily share, review and analyze data across agencies no matter where they are located.

Cellebrite Helps Advance Public Safety Initiatives:

- Speed up case insights so investigators and prosecutors can act sooner.
- Airtight chain of custody and an auditable trail from first collection to courtroom.
- One workspace for the whole team (investigators, analysts, prosecutors and more) to review digital evidence instantly.
- AI-powered review that summarizes long chats and surfaces connections, helping teams find what matters fast while preserving due process.
- Designed to comply with any security protocols and procedures.
- Empower agency teams to adopt and optimize the technology immediately through Cellebrite expert training and consultative services.

Use Cases to Apply Cellebrite Technology to Keep Communities Safe

Technology to Support Modern Policing Practices

Cellebrite's solutions generate actionable intelligence and identify known bad actors, supporting evidence-based public safety policies.

Homeland Security, Counter Terrorism and Anti-Gang

Multi-agency collaboration on complex cases (gangs, trafficking, organized drug and crime). Cellebrite cloud technology centralizes digital evidence and gives vetted partners real-time, permissioned access to the digital evidence that solves cases.

Border Protection and Operation Lone Star

Rapid mobile data triage at the front line; seamless handoff to intelligence agency with an auditable trail, all while local police, DA offices and state-level agencies work in coordination.

Crimes Against Children and Human Trafficking

AI-powered media analysis, chat and timeline review reduces time spent looking for information while protecting evidence integrity and leveraging key data from the National Center for Missing and Exploited Children.

Mobile Data and Digital Evidence

Intake, store and share all types of digital witnesses with prosecutors and the defense on a single chain-of-custody system that help cut discovery delays and overtime.

→ **Montgomery Sheriff's Office, Texas**

Processed 600+ phones, turning massive datasets into actionable intelligence, and solving the county's first fentanyl murder, exonerating the innocent and strengthening community trust.

→ **Omaha, Nebraska**

Reduced case lead times by approximately 40% and maintained a 100% homicide clearance rate for two consecutive years through integrated digital evidence workflows.

→ **Nampa, Idaho**

Accelerated case resolution by 4 weeks and achieved \$50,000 in cost savings after implementing Cellebrite solutions.
