

Easily Share and Review Mobile Data Online

Today, 70% of investigations are internal investigations

Business related communications and messaging data are critical to support internal investigations and often only available from mobile devices.

HR and legal teams currently struggle with offline tools designed for forensic experts that slow down investigations. Keeping up with the number of internal investigations affecting organizations is critical to mitigate risk and ensure matters like employee misconduct or harassment, intellectual property theft, and departing employees are addressed as quickly and efficiently as possible. Internal investigators and eDiscovery teams are overburdened with expensive tools that rely on data sharing to outside vendors. Legal teams and internal investigators need an efficient solution to gather evidence at the time of an incident, preserve the evidence and process it internally with one streamlined process.

Key Challenges in Review

Need to control cost and data associated with Internal Investigations

Gap in workflow to easily share relevant information

Analysis tools not designed for Legal or HR

Tools requiring installation are barrier to sharing results

Cellebrite Guardian Collaborate solves these issues for HR and legal teams

A share and review solution for supporting internal investigations, Guardian Collaborate enables users with a quick, efficient way to review collected data, reduce reliance on forensic teams, and find preliminary evidence to resolve investigations faster.

- Control an investigation's data risk and cost with keeping control of the data
- Surface critical insights to HR and legal with a simple interface for non-forensic experts
- SaaS-based infrastructure means no installation required for instant data sharing and review

SaaS-based and compliance-tested system with secure access from anywhere, on any device, at any time.

Reduce reliance on forensic teams through a simple interface that surfaces critical insights to HR and legal teams.

Instant review capabilities with an intuitive solution to support immediate review of mobile data - directly in your browser.

Share evidence and reports instantly, easily, and appropriately, while maintaining security to keep data defensible and litigation ready.

Control an investigation's data risk and cost by keeping control of the data in house.

A single, flexible and intuitive solution integrated into your end-to-end workflow or at key points in your workflow.

Guardian Collaborate

Empowering HR and legal teams by keeping control of data in house while still being able to share data instantly for seamless collaboration on cases.
