CFID

Covert Forensic Imaging Device
Learn more at cellebrite.com

The CFID (Covert Forensic Imaging Device) is the drone-capable forensic collection and imaging device that fits in your hand.

Battery-powered and designed for forward operating defense, intelligence and law enforcement, the CFID enables rapid collection from UAVs, SIM cards, mobile devices and portable media, while also supporting forensic imaging, active file copying, forensic wiping and drone path flight visualization.

Powerful Capabilities in One Simple, Portable Device

The CFID (Covert Forensic Imaging Device) is the world's smallest handheld battery powered, forensic collection and imaging device.

108mm (4.25") x 67mm (2.64") x 23mm (0.91")
250 grams (8.8 oz)

- ▶▶ Extract and Image USB Storage and SD Cards
- ▶▶ Extract and Preview SIM Cards with Watchlists (IMSI and More)
- ▶▶ Remote Network Connectivity and VPN (remotely access data)
- ▶▶ iOS and Android Content Extraction
- ▶▶ Immediately Extract & Preview Flight Drone Logs
- ▶▶ Automatically Recover Deleted Files

“The CFID replaces a number of tools in my deployable kit and saves me a pile of gear that I would have had to carry with me. I can pull an IMSI and check my watch-list within four seconds.”

“I just use it to zero my own media before crossing borders... peace of mind.”

“Whether in an operational environment, lab environment, or both the CFID will help you save the most important resource — time.”

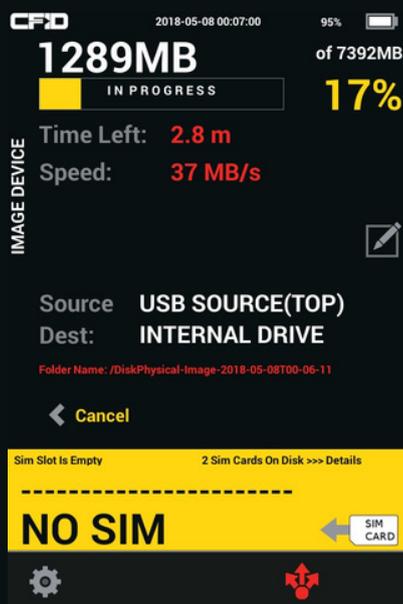

The Handheld Solution For Deployed Digital Exploitation

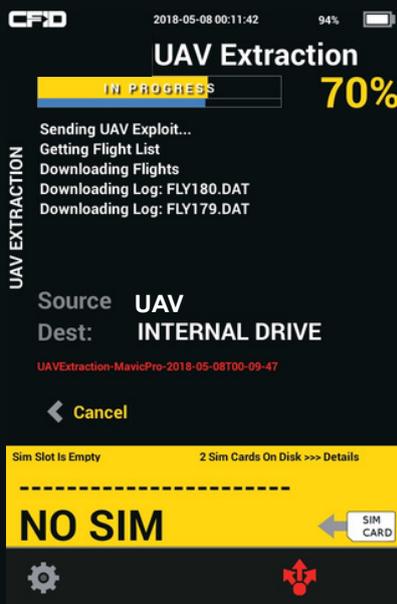

CFID Primary Specifications

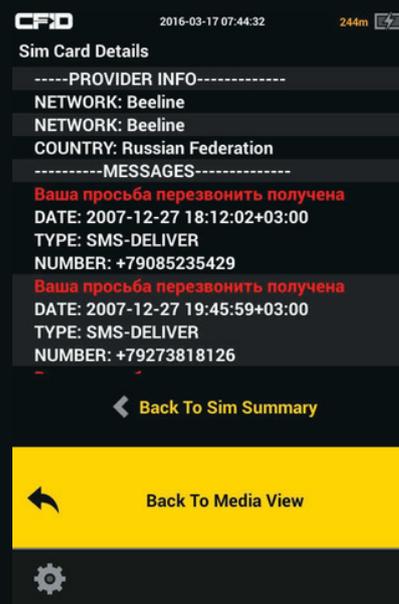

- ▶▶▶ USB 3.0 Host Ports (Input and Output)
- ▶▶▶ SD Card Slot (Input)
- ▶▶▶ SIM CARD Forensics (Both Micro and Full Slot)
- ▶▶▶ Supports SIM, USIM, R-UIM
- ▶▶▶ SIM card Watch List & Live Preview of IMSI
- ▶▶▶ Simultaneous SIM and SD / Thumb drive Acquisitions
- ▶▶▶ CNC Machined Aluminum Case
- ▶▶▶ High Resolution Screen
- ▶▶▶ Six Hour Battery (Operating)
- ▶▶▶ IMAGE – CLONE – WIPE – FORMAT Flash Media
- ▶▶▶ Internal 128 GB Solid State Drive
- ▶▶▶ Supports DD, E01 and other Image types
- ▶▶▶ 48/88MB/s imaging/wiping speed
- ▶▶▶ Supplied Ethernet Adapter for Network Reach Back
- ▶▶▶ Can be powered via: AC Adapter or Internal Battery
- ▶▶▶ Can be charged via USB 3.0 Device or AC Adapter

Extracting Flight Logs From UAV

SIM Card Exploitation .. and more

UAV Exploitation Solution

The CFID supports a large number of commercial UAV products. The CFID supports direct extraction and processing of GPS and metadata within a few moments of capture.

Visible Logs At Point of Capture

Once extracted and processed, data can be viewed instantly on an Android device of your choice with the custom CFID data viewing APK or any standard KML viewing application.

Complete CFID Kit Includes

- ▶▶▶ CFID V3 Device
- ▶▶▶ All Required Cables
- ▶▶▶ Ethernet Adapter & Card Reader
- ▶▶▶ Sim Card Adapters
- ▶▶▶ Charger
- ▶▶▶ Protective Case
- ▶▶▶ Companion Viewing APK
