

# Guardian Investigate.

Resolve Cases Faster, Together

## Challenge

### Fragmented Data Slows Investigations

Agencies face mounting pressure as digital evidence volumes surge. Investigative units struggle to solve cases effectively because critical information is scattered across systems and teams, leaving investigators and prosecutors without a complete view of the evidence.

Disconnected tools, manual processes and siloed data sources slow investigations and strain resources—impacting case closure rates and ultimately public trust.

## The Solution

### A Unified, AI Investigations Platform

Guardian Investigate, powered by AI, provides a single, secure workspace to organize adocuments and data.

It unifies UFDR and CDR location correlation, digital evidence review and task oversight—streamlining collaboration and accelerating resolution for any case.

## Benefits

Guardian Investigate makes law enforcement more efficient:

- Faster Case Closure** – AI-powered analytics reduce time-to-evidence and improve clearance rates.
- Enhanced Efficiency and Collaboration** – A unified platform enables investigators, examiners and prosecutors to work collaboratively easier.
- Real-Time Case Visibility** - Gain instant insight into case progress, task assignments and evidence status to keep investigations on track and everyone in the loop.

## Value

Guardian Investigate centralizes investigation management, delivering real-time visibility, tasking and collaborative oversight for investigations of any size. Agencies gain improved accountability, reduced meeting time and greater efficiency—even when teams are in the field. By accelerating evidence review and case preparation, it helps agencies analyze and prioritize the information needed to advance cases - ensuring the right person or people involved are brought to justice.

## Features

### Evidence Lifecycle Management

Manage and analyze UFDRs, CDRs, CCTV and documents in one workspace.

### Correlate CDR and UFDR Locations

Connect call detail records and UFDR extractions to visualize relationships and geolocation patterns for faster leads.

### Collaborative Investigator Workspace

Assign tasks, track progress and share securely across teams.

### Dynamic Reporting

Generate courtroom-ready reports with visual narratives and audit trails.

### Crime Timeline

Visualizes case details and key evidence, helping investigators prioritize tasks, collaborate effectively and keep prosecutors informed.

## At a Glance

### → Need

Rising digital evidence and tasks overwhelms investigative workflows.

### → Solution

AI-powered platform centralizing evidence and collaboration.

### → Use Case

Complex criminal investigations requiring multi-source data analysis.

### → Impact

Faster case resolution and cost savings.
