

Cellebrite Academic Partnership Program

The **Cellebrite Academic Partnership Program** partners with accredited universities worldwide to help prepare the next generation of digital forensic professionals.

Designed for the future of digital forensics, the program combines industry relevant tools, structured curriculum, and real world investigative context—giving students practical skills aligned to modern digital investigations.

Our mission is to foster excellence, professionalism, and proficiency in digital forensics—empowering students to confidently adapt to evolving investigative challenges and contribute to a safer society.

NEW

Relaunching August 2026 for the Fall 2026 Academic Year

In August 2026, Cellebrite will relaunch the Academic Partnership Program with updated resources, improved access, and enhanced academic support for the Fall 2026 school year.

What Academic Partners Need

Academic institutions consistently ask for:

**Reliable communication
and ongoing program
support**

**Clear structure,
expectations, and
program ownership**

**High-quality academic
learning materials for
students**

The updated Academic Partnership Program is designed to address these needs directly.

What's New for Fall 2026?

The updated Academic Partnership Program includes:

- CCO and CCPA Inseyets student manuals
- Instructional PowerPoint decks for instructor use
- Inseyets.UFED simulations (no hardware or adapters required)
- Inseyets.PA licenses with student datasets
- Student access to CCO and CCPA Inseyets certification exams
- Dedicated academic program resources, including:
 - » A responsive point of contact
 - » Quick-start guides
 - » Supporting documentation

Program Packages

The Academic Partnership Program is offered in two packages:

Mobile

Inseyets.UFED simulations and Inseyets.PA licenses

Computer

Digital Collector and Inspector licenses

Note: There will be no updates to the current Computer package for the Fall 2026 launch.

University Participation Requirements

To participate, universities must:

- Be an accredited academic institution
- Assign a designated partnership lead to manage program deliverables
- Sign a formal partnership agreement with Cellebrite
